

ABOUT

The Nassau Institute

The Nassau Institute was founded in 1995 (known originally as the Institute For Economic Freedom). It is an independent, non-political and non-profit organisation that seeks to broaden the parameters of public policy debate. ● The Institute's work is supported by voluntary contributions from foundations, corporations, and individuals. Some revenue is also generated by conference registration fees or from the sale of publications or merchandise. ● The Institute seeks to advance economic growth and political liberty in a society governed by the rule of law.

The Nassau Institute is an independent, non-political, non-profit organization

S

Since 1995 the Nassau institute has been one of the very few independent voices contributing to public policy debates in the Bahamas.

The Institute produces and disseminates credible research and commentary aimed at effecting a change in the climate of ideas.

Most of our limited funds are invested in the production and mailing of informational materials and the maintenance of a sophisticated web site.

Over the years we have produced 22 *Review* publications on the political economy of The Bahamas.

We have made broadcast media appearances and contributed scores of articles and commentaries to local newspapers.

But we rely entirely on voluntary contributions as we seek to advance the principles of limited government, individual liberty, free markets and the rule of law.

Toward that goal, the Institute strives to achieve greater involvement of concerned citizens in questions of policy and the proper role of government.

We are grateful to all of our donors, who make possible our continued support of the cause of freedom in The Bahamas.

The Nassau Institute provides the only consistent voice for individual liberty and limited government in the Bahamian policy arena.

Thanks to our work, journalists and policy-makers have an alternative to official spokesmen.

Since 1995, the Institute has been influential in a range of policy debates, including:

- healthcare reform
- tax reform
- welfare reform
- free trade
- constitutional issues
- education

CONTRIBUTIONS

Your contribution is one way you can advance, in a concrete way, the values of individual liberty, free markets, and constitutionally limited government.

YES, I will contribute to the Nassau institute to help further our understanding of policies that promote economic growth and political liberty.

- Student \$25
- Donor \$200
- Patron \$500
- Benefactor \$1000 or more
